-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 August 2001.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kumar et al in view of Chen et al.

Regarding claims 1-8, Kumar discloses (col. 14, line 39 thru col. 15, line 15) the simultaneous transmission and reception of various transmission associated with information bits in an RF environment, wherein the architecture includes messages conveyed from the transmitter to the receiver, (col. 17, line 65 thru col. 20, line 40) plurality of accumulators, accumulators and multiplexors, accumulation of a plurality of control bits, control bits are added and transmitted by transmitter, (col. 18, line 1 thru col. 23, line 64, col. 27, line 22-67) binary control is stored in multiplexor, receiver and transmitter with associated accumulators, transmitter synchronized, and clock/timer for timing transmission of multiplexed control data. However, Kumar is silent on reception of acknowledgement signal. In a wireless RF communication system, Chen discloses (Abstract, Fig. 4 & 7, col. 3, line 1 thru col. 4, line 67, col. 9, line 1 thru col. 14, line 67) efficient retransmission of data, wherein the architecture includes accumulators,

multiplexors for multiplexing of pilot data and control data, accumulation of packets, plurality of base stations, acknowledgment procedures associated with the destination device (communicating party/receiver). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to be motivated to implement acknowledgment of reception of information a by communicating party as taught by Chen with the teachings of Kumar for the purpose of knowing if transmitted information is corrupted.
